DETAILED ACTION

Specification

1. The following title is suggested: Electric power steering apparatus.

Claim Objections

2. Claim 2 is objected to because of the following informalities: "more upwards" should be changed to "above". Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Matsumoto et al., JP 11-291920.

In regards to Matsumoto et al. shows all of the claimed elements including the steering shaft having a steering wheel attached, steering column, electric assist motor attached to the steering column, and a pivot for tilting disposed between the electric motor unit and the tilt/telescopic adjustment means (Reference is made to Figures 1-8).

Allowable Subject Matter

5. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3616
